

# 1095 Pistol Target

---

## 1095 Pistol Target

### Overview

The 1095 target is designed to be printed on an 8½ x 11 inch sheet of paper. It is printed from your computer at home. It is designed to record and improve your pistol and revolver shooting.

It was developed based mostly on the common B27 and B24 targets. Traditional targets that have 10, 9, 8, 7, 6 ... scoring rings do not lend themselves to accurately judging improvement from one target to the next. This is why the 10, 9, 5, 3, 1 ring values were developed. Thus, the name of the target is 10 9 5.

### Course of fire

#### Shooting

Most self-defense engagements are within 7 yards. The 15 shots that are then scored are shot from three ranges inside 7 yards (21 feet).

1. Start with the gun at 7 feet from the target. Try to fire 5 shots into the 10 ring.
2. Move so that the gun is 14 feet from the target. Try to fire 5 shots into the 10 ring.
3. Move so that the gun is 21 feet from the target. Try to fire 5 shots into the 10 ring.

#### Scoring

Any bullet hole that cuts a ring is scored as the higher value.

Use the 1 and 3 ruler for any bullet holes that are outside of the 5 ring.

Count the number of hits in each ring and multiply this by the ring value.

Then add the scores together for the final score.

#### Point rating:

Excellent	150 – 145
Good	144 - 135
Fair	134 - 120
Acceptable	119 - 110
Needs Work	< 110

#### Challenge yourself

Work on your basic skills before moving to more advanced skills. Shoot at Good or Excellent levels before working on more advanced skills.

#### Fun Dots

The fun dots are the circles in the corners of the 9 ring.

- The 1095 target can be used for precise shooting also. Use the round dots for well-aimed shots.
- Engage multiple dots and numbers to add some fun to your shooting.
